“CHEMOTHERAPEUTICS FOR THE 21st CENTURY”

Featuring Maria Emanuel Ryan, DDS, Ph.D.

Featured Speaker of CDHA Spring Scientific Session 2003

Cost: \$40 • Includes audio CD, speaker handout, Test Sheet • 4 units continuing education credit

Exciting advances in pharmacotherapeutics have given the practitioner a wide array of treatment options for the improved management of periodontal disease. Several adjunctive chemotherapies have been developed in efforts to optimize clinical results particularly in more susceptible patients such as smokers and diabetics. The question arises, however, as to “when”, “why”, and “how” these new therapies are incorporated into our clinical practices, as well as “what results can be expected in our patients?” The participants will be brought up to date on locally applied antimicrobials (Atridox™, PerioChip® and Arestin™).

Maria Emanuel Ryan, DDS, Ph.D., a 1989 Stony Brook School of Dental Medicine graduate, is an Associate Professor in the Department of Oral Biology and Pathology at the School of Dental Medicine at Stony Brook. She received her specialty training in periodontics at the University of Connecticut Health Center, and her Ph.D. in Oral Biology at Stony Brook

“DRUGS, DEATH AND DENTISTRY”

Featuring Stanley F. Malamed, DDS

Featured Speaker of CDHA Spring Scientific Session 2004

Cost: \$40 • Includes audio CD, speaker handout, Test Sheet • 4 units continuing education credit

The incidence of serious injury or of death within the confines of the dental office is, happily, quite low. However, on occasion, such problems do occur. In recent times national television news magazines have publicized the deaths of several patients undergoing dental care. In this presentation, Dr. Malamed will review these and a number of other cases, illustrating what went wrong, and what could have been done either to prevent the incident from occurring in the first place or, failing that, what should have been done to produce a better outcome.

Stanley F. Malamed, DDS, graduated from the New York University College of Dentistry in 1969. He then completed a dental internship and residency in anesthesiology at Montefiore Hospital and Medical Center in the Bronx before serving for 2 years in the U.S. Army Dental Corps at Ft. Knox, Kentucky. In 1973, Dr. Malamed joined the faculty of the University of Southern California School of Dentistry, where he is Professor of Anesthesia & Medicine. Dr. Malamed is also a Diplomate of the American Dental Board of Anesthesiology, as well as a recipient of the Heidebrink Award (1996) from the American Dental Society of Anesthesiology and the Horace Wells Award from the International Federation of Dental Anesthesia Societies (1997).
